THE TRICOMP GROUP

TRICOMP

Technology with Passion

Congratulations South Sudan

The state-of-the-art building complex that houses the Ministry of Telecommunication and Postal Services in Juba

The Tricomp Group of Companies takes this opportunity to heartily congratulate the People of South Sudan on the historic attaining of independence through a world class democratic process. We are proud to be associated with Africa's 54th state.

Zlote Tarasy, Warsaw: One of Europe's Largest multifunctional complexes: A key development of the Group"

ABOUT THE TRICOMP GROUP

The Tricomp Group is a Polish based conglomerate with headquarters in Warsaw, and physical presence or representation in over 15 countries worldwide, including Angola, Benin, Bulgaria, Burundi, Djibouti, Ethiopia, France, Germany, Hungary, Kenya, Netherlands, Nigeria, Rwanda, Southern Sudan, The United Kingdom, Togo, Uganda, United Arab Emirates – Dubai among others.

Driven by the principle of client satisfaction and the provision of high quality, technology-driven products and services, the Tricomp group prides itself in its team of highly qualified and soundly experienced multicultural staff.

We relish in being a homegrown provider of Technology services within our African sub – continent by deploying major projects in Eastern Africa and Southern Sudan such as the Southern Sudan National Telecommunications Gateway Complex, the national ICT infrastructure for local banks in Southern Sudan, fibre backbone expansion in Rwanda, Internet broadband to ISPs in Burundi and in Southern Sudan through a local subsidiary, mzuri.net among other projects.

Please feel free to contact us or visit our website at www.tricomp.com.pl

At Tricomp , our expertise, experience and advances in technology has enabled us to offer our clients professional and high end telecommunication, IT and Building Infrastructure services and tailored solutions for the last two decades.

Our Service portfolio includes solutions we have provided to Governments, Central and Commercial Banks, Multinational corporations, Internet Service providers, Real Estate Companies, Military and Educational Institutions.

Building Infrastructure Solutions

Tricomp delivers high quality, superior engineering and professional services, bearing in mind ecological factors, modern architectural design and functionality as well as turn-key services where required.

Building Systems and Solutions Integration

Tricomp provides integrated systems and solutions for automated buildings. Our cutting-edge systems offer clients the optimal solutions for energy efficiency, comfort and security for all types and sizes of buildings. Our highly scalable technologies allow for efficient solutions for a wide variety of needs - ranging from offices, business centers, hotels, residential towers to institutions of learning and homes.

Project Management

The Tricomp Group specializes in the management of a wide range of projects be they public, industrial, commercial or residential. We offer professional supervision and oversight of projects dealing with every stage of the process from conception, design, construction, up to final completion and handover. A recent example being the headquarters of the ministry of telecoms in Juba in which we managed every aspect from design to completion of the IT and telecoms infrastructure as well as designing and constructing of the gateway complex building.

Telecommunications and Data Networks

Through our subsidiaries, we operate large data and internet backbones in three East African countries. We provide a comprehensive package of services over our networks including Internet Protocol Services, broadband transport, infrastructure services and collocation services.

We design and deploy detailed and extensive data networks, Network component evaluation and selection.

These services enable our customers to meet growing demand for advanced communications solutions.

Transport Logistics

Through a dedicated fleet of our own as well as leased trucks, we accommodate the ever increasing need of trucks and trucking services. We provide trucking and haulage for our own cargo to fulfil the requirements of our projects and with spare capacity offer services to our partners and clients in South Sudan as well as other parts of East and Central Africa.

Our commitment to International quality standards ensures that we provide the level of service that exceeds our customers' expectations.

Our Work With the Communities

Through our Group Foundation the Simba Friends Foundation, we support and have instituted community projects which promote skills development and enhancement of livelihood opportunities for young people in developing countries using information and communication technologies (ICTs) for purposes of self-reliance and life-long learning.

The success of our community programs e.g. the Sega Silicon Valley Community Program in Kenya underpins our commitment to supporting vulnerable and disadvantaged youth – with an emphasis on gender balance - discover their potential, build productive skills and link them to opportunities for self-development, community development and enhancement of self-esteem while encouraging intercultural exchange we have supported and instituted many other community development and youth empowerment programs in Africa and Europe.
